

Queensland Leaders

Fostering the next generation of international businesses based in Queensland.

Each year Queensland Leaders selects up to 20 leading private sector companies from all the nominations received to become Queensland Leaders members.

It is a unique organisation in which successful private and public companies, and the individuals who lead them, give back to Queensland business by helping to foster, mentor and inspire others to success.

Members participate for 12 months, with a focus on skilling up the founder and senior executives of the organisation and providing them with exclusive access to investment and other market opportunities.

Queensland Leaders partners, sponsors and board members combine to assist and mentor Queensland's next generation of international businesses.

It is a uniquely Queensland program and members receive structured, ongoing strategic mentoring and a networking program with industry, government, and peers. A large part of the attraction for members is access to a trusted and exclusive network in which to promote services and opportunities.

There are 30 Knowledge Workshops in professional development and life skills and 20 Personal Mentoring Sessions with industry professionals, in an 'ask the experts' format. Members also have exclusive attendance at 10 networking receptions with key government and industry leaders.

Key advantages for members are access to further capital and business opportunities and invitations to private social networking occasions as organised on a regular basis. Queensland Leaders involvement is also an opportunity for members to present as being market leaders in their industries.
